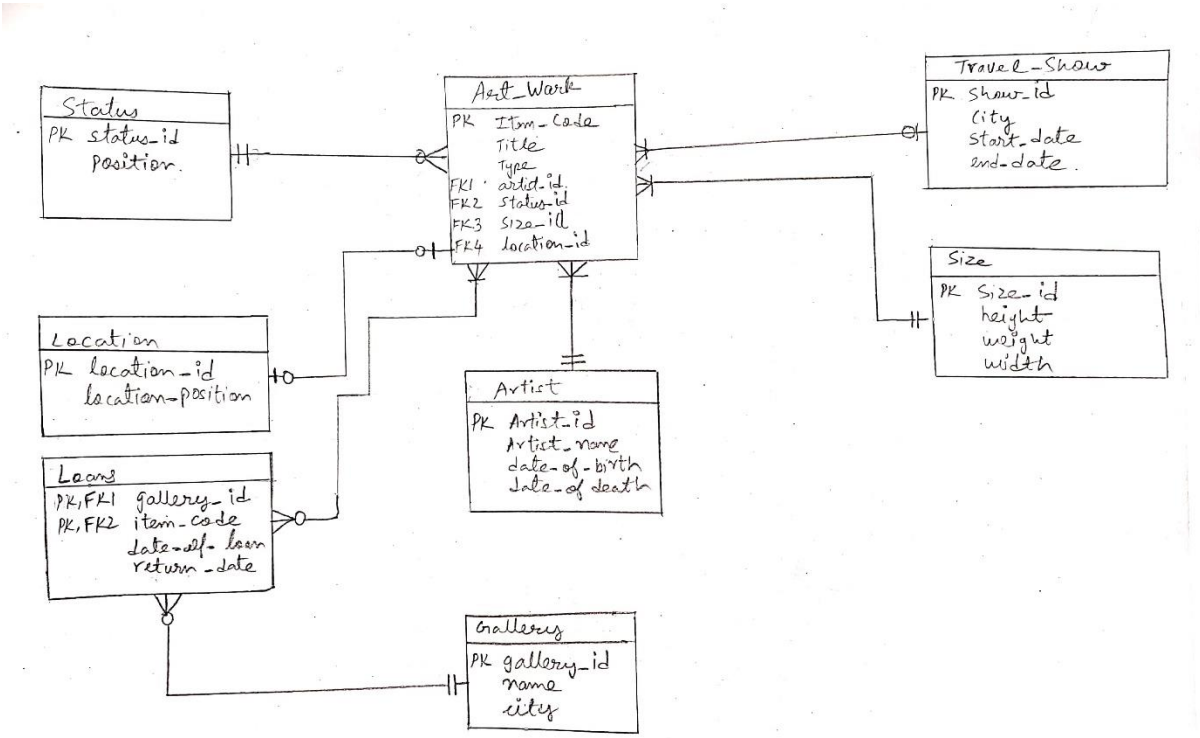
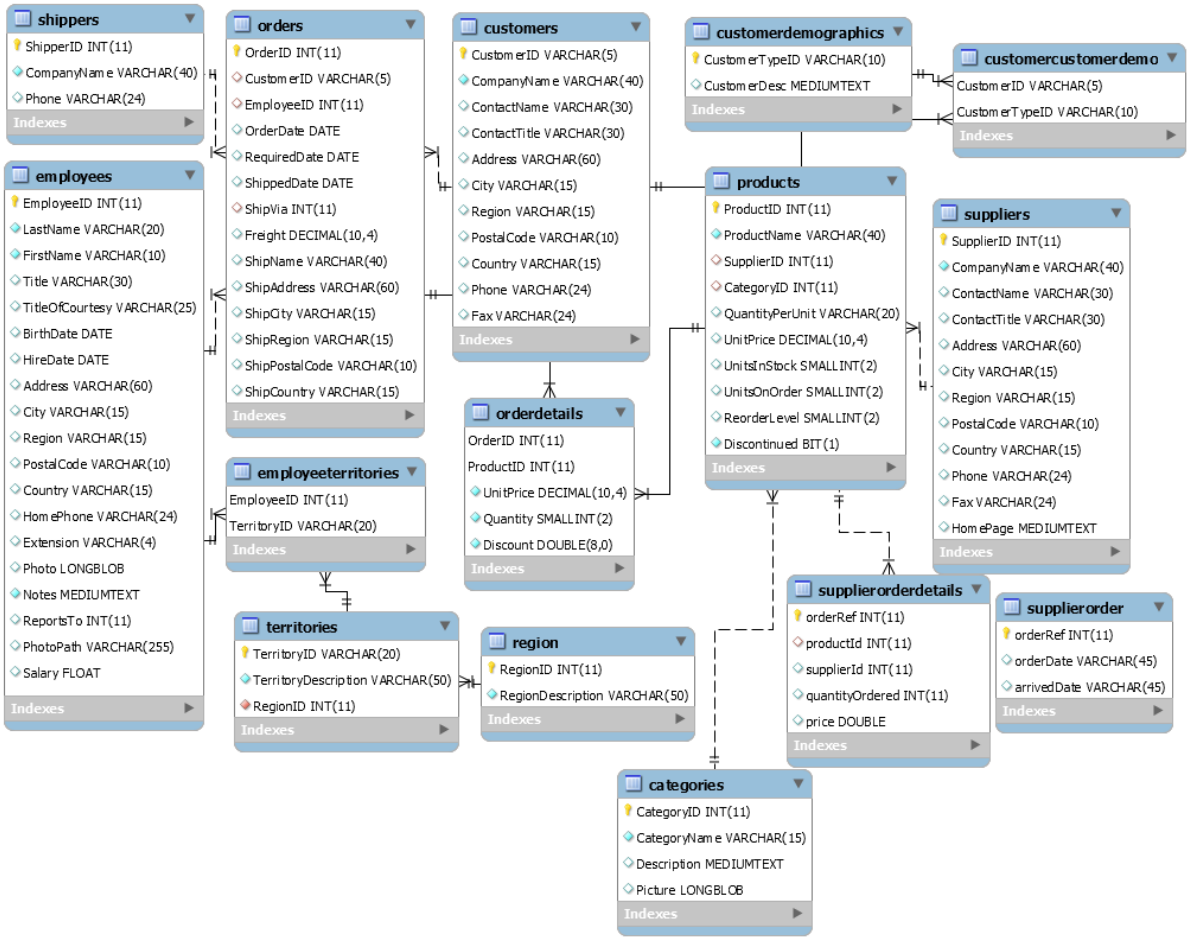
ASSIGNMENT 6

PROBLEM 1



PROBLEM 2

ER DIAGRAM



Q) Argument as to why we should believe that your program operates as required.

A) My program i.e. HistoryControl implements inventoryControl which contains all the methods inside it. It provides all the information of Ship_order() method, Issue_reorders(), and Receive_order(). We could also maintain the product sales for each day like history of the product sales day wise but that is out of the scope.
